電度と揺れの状況

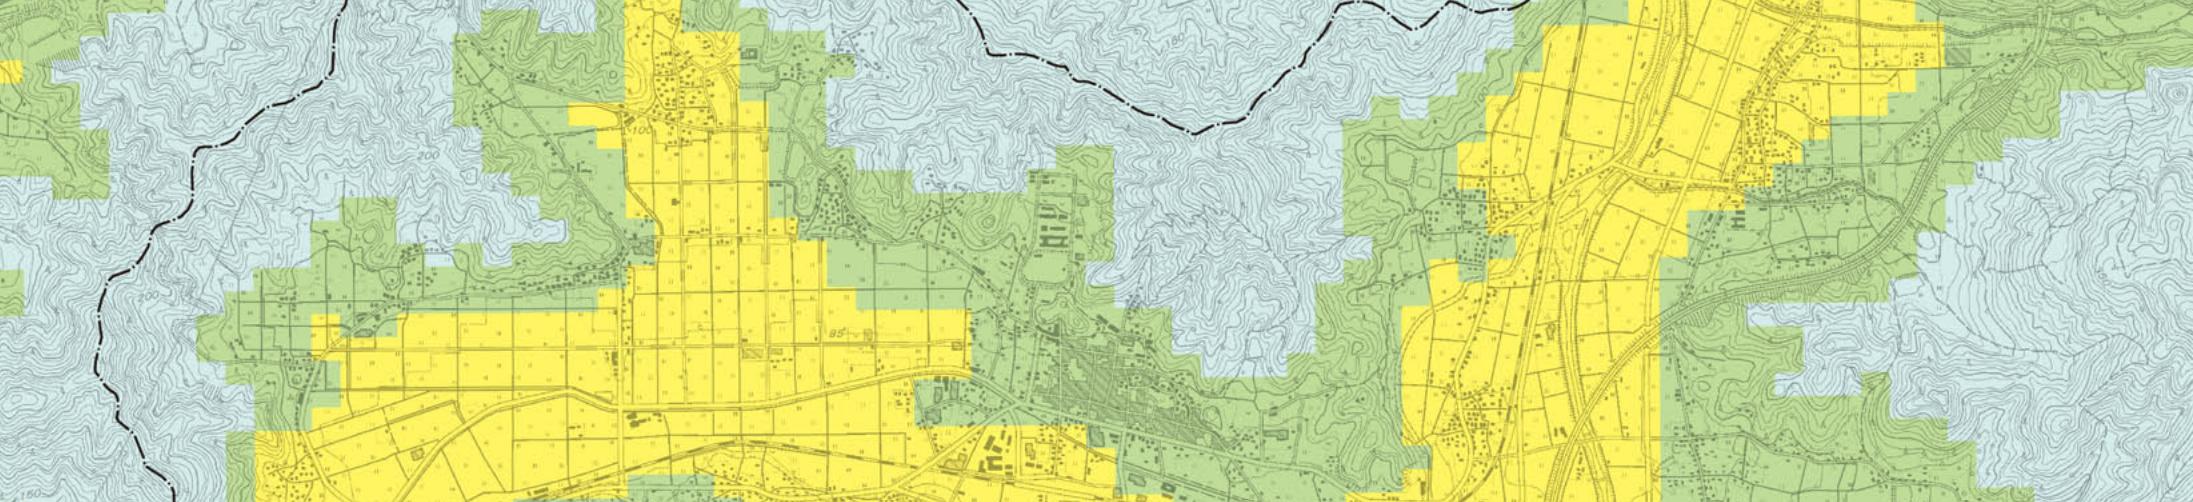

ANSWER

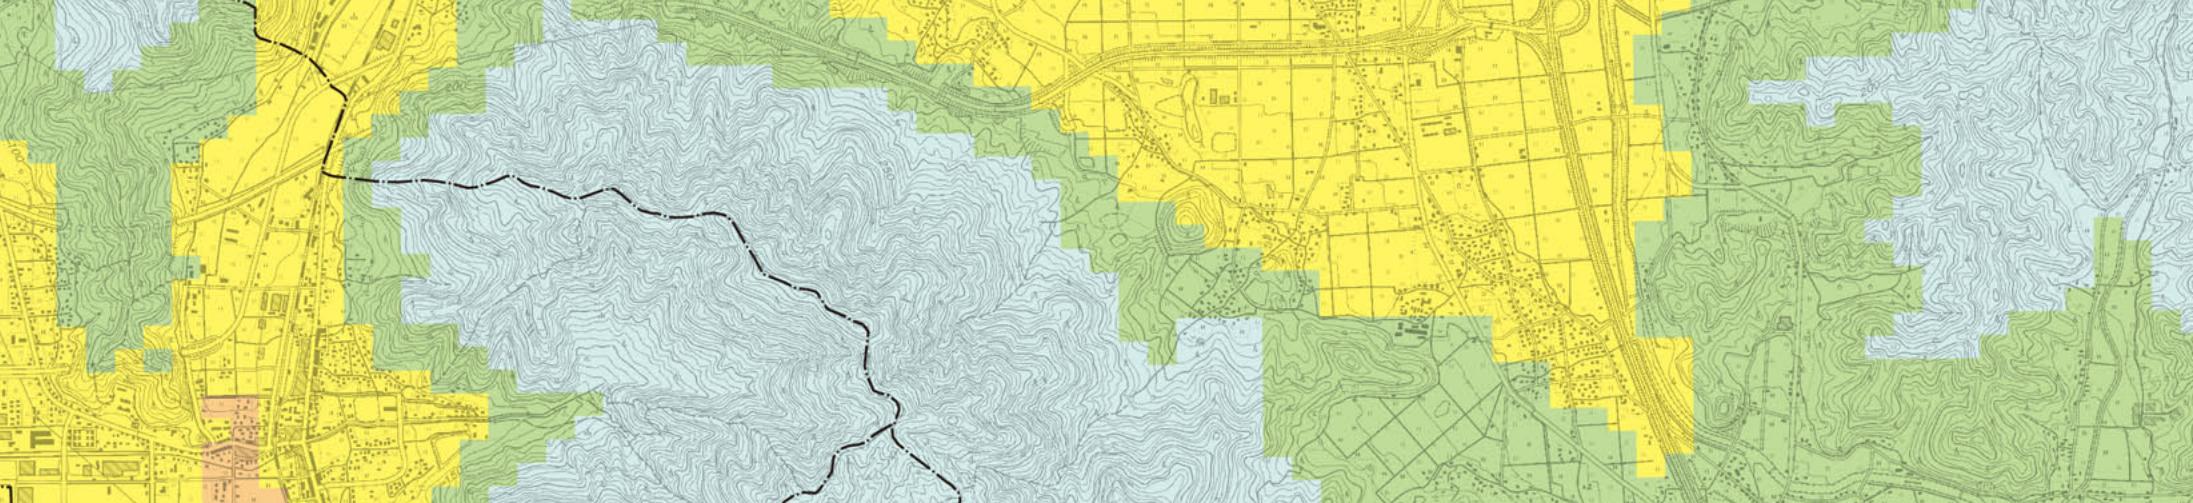

A topographic map featuring contour lines and a yellow shaded rectangular area. The yellow area is positioned in the center-left portion of the map, bounded by approximately N40°E to N50°E and E10°W to E20°W. The surrounding terrain is depicted with green and grey shading, indicating different elevations or land types.

Topographic map showing contour lines and a bridge across a river.

An aerial photograph of a large industrial complex. The facility features multiple large, rectangular buildings, some with multiple stories and gabled roofs. A prominent feature is a tall, dark chimney standing between two buildings. Extensive paved areas, likely parking lots, are visible around the buildings. The complex is situated along a network of waterways, with several canals and a larger river visible in the background. The surrounding terrain appears to be a mix of developed land and some green spaces.

Topographic map showing contour lines and a shaded area representing a specific region.

Topographic map showing contour lines and a green shaded area representing a specific region.
